

# SEKI PRESS CO., LTD.

株式会社 関プレス

- Integrated system of production from dies to shipping
- Positive proposals of substitution plans to cut the cost
- New plant in Hanoi (Vietnam) is starting operation in 2015

## Integrated system of production from dies to shipping

- We design dies for press within our facility for reliable quality.
- We carry out fabrication of single press die, progressive press die as well as various other dies.
- Moreover, we carry out a part of welding, assembling and washing.
- We assure our product by Automated Coordinate Measuring Machine.

## Positive proposals of substitution plans to cut the cost

【Product Examples】

1 Press-conversion of cutting product

*reduce costs by 15% and reduce the delivery time by 80%*

2 Press-conversion of die cast

*As compared to the die cast, the cost reduced by 20%*

3 multiple & simultaneous welding and

4 single process for simultaneous punching and shaving

*The number of processes and the cost of dies/welding are reduced by 50%*

## Development of World's First Technology!!

- World's first technology "WARISAKI" Search on YouTube [WARISAKI](#) !!  
Split metal by pressing
- We acquired domestic patents and already applied for Taiwan & international Patents.

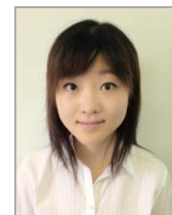

*No Technology, No Future*

- \*Since we founded in 1950, we've engaged in automobile industry.
- \*We carry out from single die press to progressive die press.
- \*Besides mass production, we also cover trial, small-lot production.
